

# EAGLE™ Basic I Pro Motion Control Solutions for CMMs

# **Product description**

The EAGLE™ product family offers a comprehensive package of controllers for all kinds of coordinate measuring machines. Whether for machine builders or retrofitters, the EAGLE™ controller family stands for the highest speed, exceptional machine throughput and accurate results.

## System integration

#### EAGLE™ basic

Reduced to the max. Pantec's EAGLE<sup>TM</sup> basic fulfills the requirements of medium profile CMMs, focusing on touch trigger probe applications at the highest performance level. Equipped with three servo drivers, interfaces to all established CMM softwares, and integrated power adaptor, all in a space-saving 3U 19" housing, EAGLE<sup>TM</sup> basic is the choice for standard applications.

#### EAGLE™ pro

The EAGLE™ pro series are high-end controller systems with very high flexibility and unlimited measuring volume. By adding optional boards, the application areas can be easily extended, e.g. for scanning applications.

EAGLE<sup>TM</sup> pro/4: Equipped with a fourth axis for all machine types, like gantry or CMMs with rotary tables, EAGLE<sup>TM</sup> pro/4 is the ideal solution for complex metrology applications.

EAGLE<sup>TM</sup> pro/4 HP: The additional fourth axis plus 1000 W total power makes EAGLE<sup>TM</sup> pro /4 HP the ideal controller for power demanding measuring machines.
